Aleksandra Mieszko, aleksandra@actiaforum.pl*

All tickets of the registered participants will be distributed by Organizers before check-in.

11 ports in the Baltic involved in LNG bunkering infrastructure facilities

in Baltic Sea Ports Projects

"LNG in Baltic Sea Ports" Projects are Motorways of the Sea activities co-financed by the EU TEN-T Multi-Annual Programme and offer a possibility in the process of adapting to the new SECA sulphur content limits. The initiative aims to foster a harmonised approach towards LNG bunker filling infrastructure in the Baltic Sea area and seven ports are involved in the first project – Aarhus, Copenhagen-Malmö, Helsingborg, Helsinki, Stockholm, Tallinn and Turku.

The sequel project, co-ordinated by Port of Helsingborg expands the development of LNG small scale infrastructure in the Baltic ports of: Trelleborg, Sundsvall, Rostock and Klaipeda-Klaipedos Nafta. "LNG in Baltic Sea Ports" Projects will result in the establishment of an extensive network of ports with planned facilities for LNG bunkering in the Baltic region – 9 core and 2 comprehensive ports.
